DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okuba et al.

Okuba et al teaches a cylindrical printing blanket that comprises a seamless sleeve (Fig. 1, 21) is to prevent a liquid from permeating through the end faces and is filled with a compressive elastomer, a sheet like blanket having a fabric layer (Fig. 1), a compressive layer and a surface printing layer (Fig. 1, 2). A bonded thread layer formed by winding a thread in spiral on a sleeve (Col. 4, line 4-6) via an adhesive layer (Fig 1, 31) and is groove generated.
